Email: zoning@piattcounty.org

NOTICE TO APPLICANTS FOR PERMITS

It is the policy of the County of Piatt, Illinois, through its Zoning Office and the [DeWitt-Piatt Bi-County Health Department](#) to condition the issuance of a residential or commercial building permit upon the Health Departments approval of the plans and provisions for the proper handling of the water distribution and/or sewage disposal systems which will service the proposed development.

Therefore, please be advised that prior to the issuance of any permit for the construction of a new building, the addition onto an existing building, or the change in use of a building or property, any of which effects a change in the current utilization of a private or community water well and/or a private sewage disposal system, you must contact the Health Department for the approval of your plans. This means that it is your responsibility to make contact with the Health Department either in person, by telephone or through your water well and /or sewage disposal contractor. In contacting the Health Department you must inform them of your intentions for new construction, addition, or proposed change in use of a building and or property. The Health Department will instruct you on the procedures necessary to comply with the County Health code and provide you with the property application forms.

Upon approval by the Health Department this form must be returned to the Zoning Office. It will be attached to your permit application, and a permit may be issued.

CERTIFICATION OF APPROVAL

I, _____ . am an authorized individual of the DeWitt-Piatt Bi-County Health Department, and do hereby acknowledge by my signature below, that I have reviewed the proposed plans for the water and/or sewer systems submitted by _____ for the _____ located at _____ and have found that the proposed plans comply with all applicable Health Department rules and regulations with regard to said systems.
